[Navigation](#) [Registration](#) [FAQ](#)

The image shows a user interface for downloading a file. It includes a folder icon with a cloud, a message stating the file is ready for download and was updated 14 hours ago. It identifies the fastest source as use.net.nl and provides a 'Download' button with a download icon and a 'SECURE SCANNED' status. There is a rating of 6.4 with 2865 views and a note that users need to log in to post comments. At the bottom, there are three navigation links: Navigation, Registration, and FAQ.

The PASSAGE TAKES YOU FROM THE PAINT RACK.Q: c# compiler can't find definition for a extern alias I need to use the IMU direction calculations from this question. The function itself is in the namespace Coord.Algos in the link. I have a function called "calculateIMUDirection" and the issue is that I'm trying to call it but the compiler isn't seeing it. The lines I'm trying to compile are : using Coord.Algos; void somefunction() { double[] IMUdirection = new double[3]; //calculateIMUDirection(IMU, IMUdirection); IMUdirection = calculateIMUDirection(IMU, IMUdirection); } and double[] calculateIMUDirection(IMU, double[] IMUdirection) int L = IMU.L.count; double x[3]; double y[3]; double z[3]; for (int i = 0; i
